

iStage Studio is committed to keeping your personal data safe and will never share anything with any third party without consent. We believe that privacy is important and that you should always know how your private information is being used.

Website cookies

Like most websites, ours uses remarketing cookies, including the Facebook tracking pixel. This enables us to show you adverts on social media based on your visit, by placing a cookie in your browser. As always, we respect your privacy and are not collecting any identifiable information through this process. It's just a tiny file that ensures our adverts are reaching the right people at the right time.

Similarly, we use Statcounter to collect non-personal data on visitor activity such as time, date, browser information and device information. This is so we can constantly improve our service based on how it is being used. When you visit our website a Statcounter cookie (called "is_unique") may be placed in your browser. This cookie is used only to determine whether you are a first-time visitor and to estimate unique visits.

By clicking 'OK' and using our website, you agree to the use of these cookies.

Contact details

When you contact us via a website form or direct address we will collect personal data, so that we can reply to your enquiry and give you the best possible service. This may include your name, email address and phone number. All of which will never be used for marketing purposes or shared with any third party.

Mailing lists

We will only ever email you with our latest news and offers if you have previously agreed to being contacted in this way. No one likes to be hassled, so all marketing emails include a quick and easy way to unsubscribe. Your details will always be kept safe and will never be shared with any third party.

You are of course entitled to view, amend or delete any personal data that we hold. For more information, please email us anytime at info@istagestudio.co.uk
